

Kettle & Stony Point First Nation - Assisted Living Facility

The Kettle and Stony Point Assisted Living Facility was designed to provide a quality facility that is safe, efficient and conducive to the life-style of the First Nation elders.

One of the key aspects of the facility was to consider versatility for a variety of related activities such as provisions for the local meals on wheels program.

Ultimately, the facility strives for the balance of providing a home-like atmosphere with the convenience of full time Staff supervision and their needs as well.
